Low-Cost Sealing Film Applicator for Microplates

Victorville, CA. August 16, 2010. Excel Scientific introduces the unique SealMate™ system, a revolutionary new way of applying adhesive sealing films to microplates. SealMate consists of a low cost molded polypropylene dispenser and structured rolls of films with pre-scored perforations and non-adhesive end tabs. Sealing films can be pulled from the dispenser and placed on plates three times faster than with conventional sheet-cut films. In addition to time saving and ease of use, there is a reduction in waste as no liner is present requiring removal and disposal.
